

DUMP25 Whitpaper

1. Introduction

In a market ruled by whales, manipulators, and short-sellers, millions of retail investors have been

left behind. Liquidated. Shaken out. Forgotten.

DUMP25 (dump) was born out of this injustice - a decentralized symbol of resistance. It represents

every trader who got stopped out by engineered volatility. Every liquidation caused not by bad

trades - but by a broken, rigged system.

This is not just a token. It's a movement.

2. About the Founder

Pak is an independent developer and retail trader who has spent years navigating the highs and

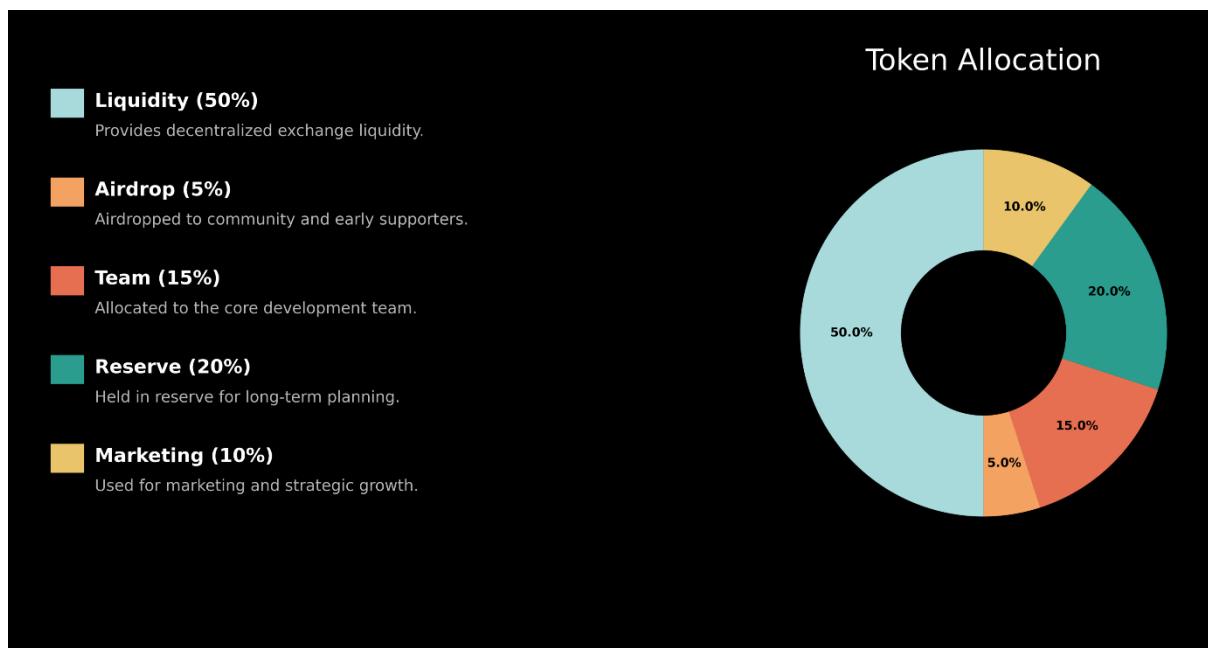

lows of crypto. He's seen the game from the ground level - the forced liquidations, the engineered

volatility, the rugpulls masked as innovation.

Disillusioned by a system designed to exploit the individual investor, Pak chose not to exit - but to

respond. DUMP25 is that response. A symbolic stand against manipulation.

3. Tokenomics

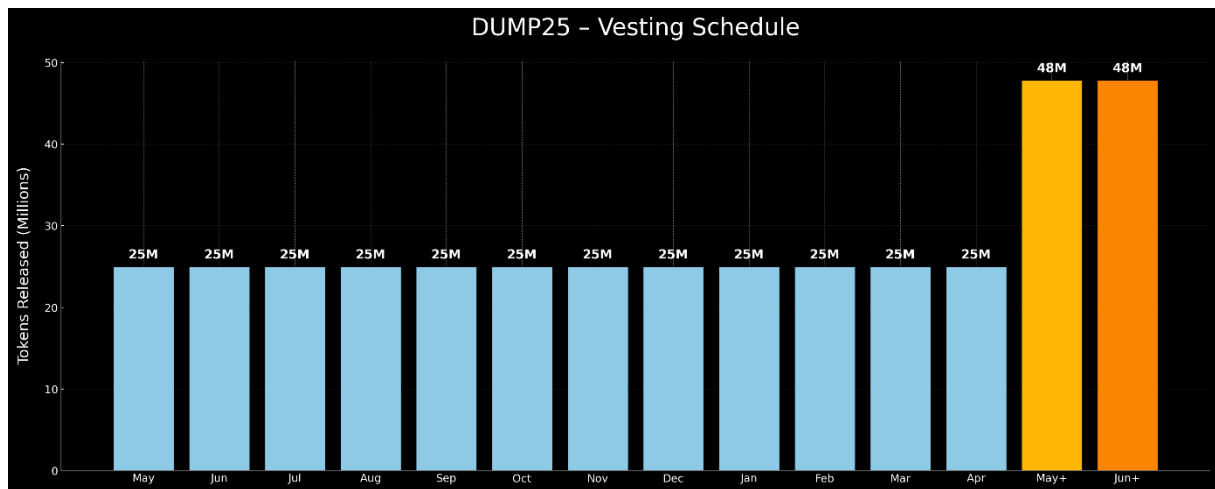

4. Vesting

Initial circulating supply: 8.6M tokens.

Starting May, 25M tokens will unlock every 1st of the month for 12 months. Final release: 95.7M

over the last 2 months.

5. Vision

DUMP25 is not a product. It's a protest.

There are no private sales. No VC manipulation. No centralized control.

This is a movement built to empower those left behind, to reunite the wrecked, and flip the script on

those who rig the system.
